In playable condition; appears to be mostly original (except for the added xylophone); extent of restoration work is unknown. New rewind gear obtained from Don Teach.

Seeburg	53996	L Conversion	Red with pinstriping	1921	----
---------	-------	--------------	----------------------	------	------

Piano Mfr: Seeburg; Probably a style L (Lillipution) piano with added 54-note keyboard.
Instrumentation: Manually played 54-note keyboard piano with mandolin attachment; no player mechanism.
Comments: Buxtone decal on front of case, which is painted red with some simple decorative pinstriping. Looks like a conversion into a mini-upright piano. Family lore is that owner's grandfather brought it home in the mid 1940s. Piano is said to have belonged to Chico Marx. It seems like a good size for a traveling vaudeville piano. Owner's grandfather lived next to Hollywood, and worked as a photographer and did many portraits of Hollywood celebrities.

Unknown Pianos

Brand	S/N	Model/Style	Case Finish	Year Mfd.	Stack #
Seeburg Piano Mfr: Unknown.	7189	F	Dark Oak	1909	----
Instrumentation: Piano with mandolin attachment and one rank of flute or violin pipes.					
Roll Mechanism: Played standard style "A" music rolls.					
Art Glass: Standard style F country scene with ten small pyramidal panels along the top of the piano case.					
Other Attributes: Tune thief (concealed button used to subtract coin accumulator credits, desired by certain route operators and owners).					
Comments: This Seeburg piano has been completely gutted except for the concealed Tune Thief button under the right side of the keybed. The owner has all the parts needed from another very early Seeburg Style E and a junk Style F, so the salvaged mechanisms will be used to repopulate the missing parts for the Seeburg Style F piano.

Art Glass: Beveled Plain Glass.					
Comments: Emerson motor, S/N 337251. The piano was advertised on Craig's list as an antique player piano. It was picked up on the South West side of Chicago and did have one original A roll. It appears to have been refinished some time ago with some non-professional restorations to the player, a few hoses replaced. No date as to when this was done. All components seem to be intact and original. Stack #408 written in pencil under the removable valves. Much dirt on the inside with a strong odor of tobacco, so guessing that it came out of a bar or tavern.

Seeburg	64039	F (piano used to restore G)	Quartered Oak	1915	----
Piano Mfr: Haddorff.					
Comments: Gutted and case cut down. The gutted Seeburg style F was shipped to David Ramey, Jr., who had been hired to restore a fire damaged Seeburg style G orchestrion (serial number unknown due to fire damage). The sides of the style F were removed and the piano back replaced the one in the damaged Seeburg G. The Seeburg G had completely disassembled, including the cabinet, with some of the parts stored in the in a building used for restoring cars, which was destroyed by fire. The original piano back was destroyed along with the top of the cabinet and perhaps some interior parts. Years later, the damaged Seeburg G was purchased by a new owner, who also brought multiple Seeburg parts, some of which could have from the Seeburg G. The previous owner had other Seeburg instruments and had also disassembled them and no longer remembered what parts went with which instrument. Dave Ramey' Jr. picked through the parts in an attempt to decide which parts were most likely from the Seeburg G. The assortment of parts included multiple art glass panels, piano stacks, drum chests, pipe chests, and pipework. David Ramey, Jr., provided a similar vintage roll frame, pump, coin mechanism, and electric motor. The stack, serial #4567, dates from 1913, so the Seeburg G was probably manufactured circa 1913. The bass drum is new with vintage hardware, but the player mechanisms are all original. Even after refinishing the rebuilt cabinet, charred veneer can still be seen on the lower bass side of the cabinet. The restoration of the piano and internal mechanisms was completed as of December, 2020. The Seeburg G now bears the serial number from the model F, #64039.

Comments: Previously located in a skating rink in Wesson, MS, in the early 1930s. Button for on/off instead of coin accumulator, which allowed for "free" play. Wiring appears to have been done at factory. There are three triangular holes on the right front where a control knob would have been and one small hole (filled) where the coin slot would have been but no slot was ever drilled. Motor reconditioned in 1992. Instrument completely restored in 1998. Silver grey refinished to oak.

Comments: Emerson Motor #73610DL. Restored about 18 years ago. Case refinished in original silver gray quartered oak finish color. Originally sold to a tavern in Reddick Illinois, (Gianottie), then to an ice cream parlor (McGinnes), then moved during the war years (1940) to an upstairs dance hall above the ice cream parlor. Then it was purchased by a private individual in about 1946, was in a house basement, suffered 2 floods (about 13 inches of water), was put in storage in a garage in Kankakee Illinois, was there for many years, and that is where the current owner purchased it. He knew of this piano and he waited 35 years for the owner to to make up his mind to sell it.

This Seeburg coin piano evidently spent its entire commercial life in a Fall River, Wisconsin, local tavern. The instrument is in mint unrestored condition, but will require a complete case refinishing and interior mechanical restoration. It has never been wet or abused and is complete and intact. There has been some "back alley" mechanical work on it, but nothing to detract from the originality of the instrument.

Piano Mfr: Seeburg.					
Other Attributes: Oak case with extension in back, 2 manuals; chimes missing.					
Seeburg	168715	MO single manual	Off White	1929	----
Piano Mfr: Seeburg.					
Instrumentation: Piano, and 61 flute pipes (24 open, 37 stopped), plus 37 metal Quintadena pipes--96 total pipes under keyed.					
Stack Type: Late 2-tier stack (common).					
Roll Mechanism: Original MO roll frame missing, replaced with Western Electric 65-note roll frame.					
Component Color Above Keyboard: Black; Below Keyboard: Black.					
Art Glass: Scenic artistry on some inset arched wood panels; with original music rack.					
Other Attributes: New tab stops: MIDI, Organ Only, Organ On, 8 Foot Diapason, Melodia, Dolce, Super Octave, Play/Stop, Rewind, and Tremolo.					
Comments: Purchased in 2003 from an owner in Pittsburg, PA area. Someone had previously begun work on it, removing (and disposing of) the roll frame, its mounting board, and all of its primary and lock-and-cancel valves. The blower was missing; now replaced with an external unit that supplies both vacuum and pipe pressure from a single 1 HP "regenerative" blower, using a "spill" process for regulation. Rather than restore it, the current owner decided to convert it to play style A music rolls, as well as play and record MIDI data streams. The tracker bar connects to a pneumatic-to-electric chest that provides signals enabling the electronics to drive the magnets for piano and organ notes, as well as for control functions. The original set of pallet valves under the keys were left intact, to allow manual playing of the organ. Both the pallet valves and the original tracker bar cutout unit were re-conditioned and their rubber tubing teed into the pneumatic-to-electric relay chest input ports, which obviated the need to cover up the holes in the tracker bar during manual playing. The MIDI interface uses hardware and software designed and freely shared by Thorsten Klose in Germany.
